\*\*\*\*\*

## Abstract:

This is a multidisciplinary research and review paper. The objective of this article is to show that the *yogic power* of UFO-ETs is as good as the high level yogis of the present day earth yogis, and in most cases it is comparable even with the ancient great yogis that existed on earth during the Vedic period. We give many examples from UFO-ETs as presented in the modern literature. Similar examples from such yogis can be found in the ancient literature on Vedas, Bible, and on the books of Judaism.

(A) This article therefore will not try to prove the *existence* of UFO-ETs. The military of the United States of America has accepted the existence of UFO in an unclassified presentation to the US Congress in 2022; and definitely more were presented in the corresponding classified session, effectively negating the previous cover up efforts. Moreover, more than a million people on the earth have direct experiences with the ETs which should be considered more authentic than what the governmental authorities publicly indicate.

(B) The article will show that the characteristics of all objects of the universe are same, and therefore there is a *unified theory* for everything in the universe, and this unified theory is the same as described in the Vedas. The yogic power of UFO-ETs helps us to understand the past history, covering several millions of years of the earth, described in the Yuga theory and in the Genesis of the Bible.

(C) It appears then that the UFO-ETs have come to the earth from other planets of the stars of galaxies; which are now, probably, in their Sattya Yuga. Our earth is now in *Kali Yuga*. But because of the periodicity law, we also had a Sattya Yuga at one time and with UFO-ET like capabilities. We find such examples in Vedic literature. Yuga theory is known in the western literature as Gold, Silver, Bronze, and Iron ages.

(D) Therefore the UFO-ETs may have come here to show and tell their technology; and show us the spiritual characteristics of the universe, including the earthlings. They may also have come to experience a first-hand look at *what will happen* in their own Kali Yuga. Such ETs will not and cannot harm us in anyway. Many ETs have also mentioned the same thing to some of their earth-abductees. It should be obvious that the destiny is the highest level law of the universe; and therefore the UFO-ETs also cannot go beyond the destiny boundaries of our Kali Yuga, while they are here on earth.

(E) To make the article self contained, some fundamental notions are included in the three appendixes: Truth is demonstrated only by the nature; science is not the foundation of engineering; and how the manufacturing happens in the universe.

**Keywords — Vedic Theory, UFO-ETs, Eternal Recurrence, Yuga Periods, Truth, Manufacturing**

## 1. INTRODUCTION

During the past fifty years many people have tried to debunk [Dorsch] the existence of UFO-ETs. Eventually the US *Military* has mentioned in the US congress [Watson] that they do indeed exist. This shows that the purpose of the debunkers and their theories were designed by the government agencies and money power to mislead people and humiliate witnesses, to hide the presence of UFO-ETs. It should be remembered that the root cause of all activities of our earth is controlled by money and the money power [Das, 2011]. And beyond money, it is the destiny that is the root cause of all activities. We can see the activities of money, but we cannot see the destiny, unless you are a seer yogi [Das, 2020b].

On the other hand, we find that there are millions of humans [Dennett] and [Mack] on earth, who have direct and *individual experiences*, and encounters with the secret activities of the UFO-ETs. UFO-ETs have wanted earth people to become enlightened about them and about our own past. Eventually, in the near future, the truth about ETs will also be presented broadly and clearly to everybody. We can now see that, children’s TV shows, and children’s books have appeared depicting ETs as part of their stories giving them a head start. Thus the purpose of this article is - not to try to establish ETs’ presence among us, but to compare their yogic power with that of the earth yogis. And this process will establish that all intelligent humanoids in the entire universe are same; and the universe is controlled by the same samkhya

theory [Virupakshananda] described in the Vedas. The Samkhya theory is same as the soul theory.

John E. Mack, M.D. (1929-2004), a professor of psychiatry at Harvard Medical School, has explored in his book, *Abductions [Mack] of humans by UFO-ETs*. His collection shows that all persons abducted and taken inside the space ships talked about extraterrestrials floating in the air, could interact telepathically with them, could read their minds, become invisible and visible again in moments, and exhibit all the *yogic power* examples described in the Patanjali Yoga Sutras [Das, 2020b]. A summary of similar exhaustive collections can also be found in [Dennett] and his many YouTube videos.

We all have realized that different parts of the same apple taste differently. This means all molecules, and therefore all atoms, and all electrons, if they exist, have *different tastes*. Thus every electron has been created by an intelligent root cause, according to its own destiny, as we explain later, called the soul [Das, 2022]. We avoid the word consciousness, because consciousness is only one of the many properties of a soul. Since no two apples or objects are identical, therefore nothing in the universe is consistent; everything has a different and unique destiny. You can see our five fingers are not consistent.

The destiny is the highest level law of the entire universe. Universe is deterministic and predefined for eternity. This is true for every object, including all humans, and the UFO-ETs. The word Destiny is mentioned in both the Bible and the Vedas. Similar results must be there in the Koran and the books of Judaism [Das, 2013].

Destiny does not mean that you will sit idle and things will happen for you automatically. If it is not written in your destiny you will not be able to sit idle. Destiny, therefore, means you have no freewill. Destiny also does not mean miracles; there are millions of reasons for everything that happens; if you research any effect, you will find many reasons for it. Everything is simultaneously interacting with each other continuously and for eternity. Therefore nobody should be blamed for anything. There is no cursing or blessing, because everything is *already planned*. God has no role in the universe [Das, 2022]. In Sattya Yuga (age of truths) there was no God, therefore God is not there even now also. We discuss the Yuga theory, taken from Vedas, in this article.

We pick the ancient books of Vedas and Bible as our core review material. To convince their authenticity, we review all the literature which is free and is available freely on the internet. This will allow everybody to get access to the relevant document and verify its authenticity on his own. We *give examples* from modern earth yogi books, science, and engineering books also.

We also want to avoid materials from big money which will mislead us and get us entangled with false concepts. Since money is false [Das, 2011], everything created by money, and big institutions, including governments, must be false also. *False can never become true*, no matter how you manipulate them. Unfortunately, free literature is vanishing

rapidly from the internet. Kali Yuga started with 25% truth and must end with zero truth. Nobody will have to trust any article, individual, or any organization; it should only depend on you, the reader. But before we trust we must, simultaneously and distributed over this article, show or prove that ETs do indeed exist and they are interacting with humans on earth for a very long time, probably for millions of years, since the ancient Vedic times.

**Contents:** To keep this article self contained, complete, meaningful, readable, and understandable many ideas will be repeated briefly from the references. The rest of the article has the following contents: (2) UFO crash in Brazil, (3) Brazilian ET and the earth yogis, (4) Recovered body implants from UFO-ET abductees, (5) Comparing yogic power of UFO-ETs and the earth yogis, (6) Periodicity and the theory of Yugas, (7) Human characteristics in different Yugas, (8) Memory is not in the brain, (9) Giving eyesight to a born blind human, (10) Manufacturing a human baby, (11) Manufacturing a palace, (12) Conclusions.

**Appendixes:** In addition to the above items, the article also contains three small appendixes on: (A) Truth is demonstrated only by the nature, (B) Science is not the foundation of engineering, and (C) How manufacturing is done on earth and in the universe.

## 2. UFO CRASH IN BRAZIL

In January 1996, the Brazilian military captured two alien beings in the town of Varginha. The town had a population of about 100,000 at that time, in an area of about 40,000 square kilometers, and it is located south east of Brazil. Dr. Leir visited Varginha in 2002 and 2003. The following summary description is taken from the book: *A Genuine UFO Crash with Surviving ETs, A Thorough Investigation By - Dr. Roger K. Leir, The book tree, San Diego, California, 2005*.

The first witnesses were three young women, two of them sisters (14, 16), and 22, they were walking home from work by taking a short cut through a vacant lot when they encountered a strange looking humanoid creature crouching by a concrete block wall. Their first impression was that the creature appeared to be hurt and suffering in pain (p31). They described the creature as follows: "It stood about four to five feet tall with dark brown, oily, greasy skin. It had a short neck with a large head showing no hair at all. The head contained two large red eyes that were slightly upturned at the outer ends. The eyes did not show a pupil. It had a very small mouth and nose, as well as three protuberances on the top of its head going from front to back (p31)". Many hand sketches of ETs are available on the internet and in the above book.

### 2.1 Description of the ET Body

Doctors who provided medical help to the injured ET gave the following description of the ET. This is probably the most authentic and detailed description of an Extra Terrestrial (ET) being. That description is copied from the above book [Leir, 2005b, p54].

“The being was less than five feet tall. It was bipedal with two arms and two legs. The colour of the skin was a dark brown, which appeared rather shiny; like it was oily or wet but in fact the skin was dry. The skin also looked reticulated, like large scales but when you touched it, the demarcations of scales were not present. It was smooth to the touch.

One of the most noticeable features was that of the head. It was large, much too large for the size of the individual. There were three bony protuberances on the top of the head, one in each parietal area and one central. They extended from the frontal to the occipital portions, like ridges. There was no hair present either on the head or the rest of the body. The head was also larger in its upper portion than lower toward the jaw area.

The eyes were large, slightly upturned toward the lateral aspects, oriental looking. They were red in colour and looked like two glimmering pools of liquid. For some reason all of us did not want to look into this creature’s eyes and refrained from doing so. There was a very small remnant of a mouth and two little openings with a slight ridge where his nose should have been. There were no noted ears, only small openings that looked like vestigial ear canals.

The neck was narrow in diameter and appeared it would not have enough muscular strength to support such a large head. The upper portion of the torso was slight of build with an obvious rib cage. There were no noted breasts, areola or nipples. The abdomen was similar to that of a human with the absence of a naval.

The upper thigh portions were muscular and out of proportion to the rest of the torso. This was totally different from the arms, which were thin and emaciated. The hands ended in four fingers with no thumb. The fingers were strange and different than human fingers. The creature was able to move each of his fingers so that they could articulate with each other, and by doing so, was able to probably perform all the functions we could with the use of our thumbs. We were not able to tell whether these fingers were multi-jointed or for some reason the bones were flexible, enabling the fingers to perform their desired functions.

The upper leg and thighs ended in what appeared to be similar to a human knee joint with an oversized patella. The lower portions of the leg were also similar to that of a human. The entire lower extremities were heavily endowed with muscles. It crossed my mind that wherever this creature had come from, the gravity might have been much more than here on earth. The foot was narrow and fleshy. There were three short fleshy toes that looked more like pads than toes. There were no visible toenails or fingernails.

There was an additional appendage that hung down from the medial side of the foot. This vestigial appendage was elongated like a finger and ended in what appeared to be a claw about three quarters of an inch long. Later we found when the being walked, it would move this appendage so it became parallel to the rest of the foot. This allowed it to ambulate in a normal human-like manner.”

## **2.2 Medical Treatment of the ET**

The following description of the treatment has been copied from the above book [Leir, 2005b].

“The sight of the injury was in the upper thigh and involved a compound fracture of the femur. The bone was protruding from the skin and there had been some bleeding around the sight of the wound, which had clotted and was dry (p55).”

“The patient was apparently awake. It kept moving its head but mainly stared upward at the ceiling. We did make an attempt to communicate verbally but did not receive an answer. We were concerned as to whether it was feeling any pain, but we really had no way of knowing. When we examined the fracture sight it did not jerk away, scream, or give any sign of discomfort.”

“To our surprise the blood was dark red, just like our blood. When the blood was examined under the microscope we found the cellular structure to be very similar to human blood with the exception of the platelet count being much higher in number. We also found the blood would coagulate immediately upon release from a blood vessel. We were not able to determine whether this was due to the high platelet count or whether the creature was in a different atmosphere than it was used to.”

“The bone was similar to ours, with the exception that it was pinker in colour and contained numerous lacunae or holes, giving it the appearance of osteoporotic human bone. Another difference was its tensile strength. It was much stronger than human bone. We did not find it necessary to use stabilization devices to fixate the fracture site. Once the bone ends were approximated, the fracture defect seemed to stabilize and could not be moved apart.”

“The patient remained very still. Its respirations were shallow, as if it needed very little air to sustain life.”

“We checked on the being from time to time. It seemed stable and had a fantastic rate of healing. The wound healed completely in less than twenty-four hours. This was also true of the bone. It was completely mended within the same period of time (p57).”

## **2.3 What did the ET say**

“Suddenly, out of nowhere the room began to fill with a greenish mist. We did not know at this point whether it was a gas, vapor or mist but finally realized it seemed to be emanating from the creature lying on the table. In deep fear, I walked slowly closer to it and approached the head of the table. Without consciously realizing it, my gaze caught the eyes of the being. His eyes were glowing red and appeared as two swirling pools of liquid. They were pulling, pulling me in, deeper and deeper. All at once giant portions of information came pounding into my head. These were like thought grams, large blocks of information. Over and over and over, like someone hitting me in the head with a hammer. I was also becoming dizzy and slightly nauseated (p57)”.

The book says - All that I am willing to tell you at this time is what the creature told me about human beings. I also want to tell you he downloaded a tremendous amount of knowledge into my head. It caused me to have headaches lasting for over two weeks following the event.

“Essentially he told me his race felt very sorry for the human beings for basically two reasons. The first is that all humans have the same potential and abilities to perform the very same things his race could do. Those things we find so marvelous and magical but humans did not know how to do them. For example he told me in cases where there is injury or disease of the body, it would not be necessary to confine one of his species to a special treatment facility such as the one he was confined in at the moment. He told me they either individually or joined together could produce all the healing necessary to repair their bodies. The second reason they felt sorry for us was we did not seem to realize we were spiritual beings only living in a temporary shell and we were totally disconnected from our spiritual self (p57)”.

### **3. VARGINHA ET AND EARTH YOGIS**

#### **3.1 Placebo Surgery**

We have seen in a previous section, an UFO-ET broke his leg, when their UFO crashed in a Brazil site. The military called a local doctor to fix it. As soon as the doctor put the broken bones together, he immediately started healing, and on the next morning he was completely cured. His bones were also healed.

**Village Sadhu – cut arm:** A similar incident happened around 1945 in India. In a village in India two police officers were chasing a suspect, running away from a murder scene. One of the officers threw his axe to the man that almost chopped his right hand, but he was still running. Eventually they stopped him. They found that the man was a divine looking yogi or sage. They expressed their regret and asked for his forgiveness. The yogi put his arm in its place and it attached and the blood stopped. The yogi said come under that tree three days later and it will be healed. So they went back to see the yogi, and he was completely healed with no sign of any scar. This event is described in [Yogananda, p30-31].

#### **3.2 Telepathy**

The doctor who treated the Brazilian ET had a telepathic experience with the ET. He said all at once giant portions of information came pounding into my head. These were like thought grams, large blocks of information. Over and over and over, like someone hitting me in the head with a hammer. I was also becoming dizzy and slightly nauseated (p 57).

The book [Govinda, p114], describes one such telepathic communication skill acquired by yoga meditation that can help to communicate with another person in a different country without any knowledge of the person. While living in Tibet, Lama Govinda wanted to know about his mother's

condition in Germany. A Tibetan yogi within few minutes brought the details about his mother. Two weeks later Govinda received a mail from his mother confirming the exact same information.

#### **3.3 Chakra Illumination**

Brazilian doctor who treated the wounded ET described that suddenly, out of nowhere the room began to fill with a greenish mist. We all stepped back from the operating table. We did not immediately know the origin of this mist and feared it might be toxic .... We did not know at this point whether it was a gas, vapor or mist but finally realized it seemed to be emanating from the creature lying on the table (p57).

Chakras of the human bodies can emit glow of light. Swami Rama demonstrated that in an auditorium, and a person took a photo using a Polaroid camera. A YouTube video is available on the internet. It is also mentioned in the book by [Green]. The above mist was possibly created by the yogic power of the ET so that the Chakra light can become visible and the doctor can come near him to listen to him by telepathy. Earth yogis can also materialize anything, including mist, from root material particles [Yogananda, pp38-43].

#### **3.4 Veda is Universal and Eternal**

The ET told the doctor, using telepathy that they felt sorry for us because we did not seem to realize that we were spiritual beings only living in a temporary shell and we were totally disconnected from our spiritual self (p57). The humans have the same potential and abilities to perform the very same things his race could do. Thus this ET did not realize that we use the same Vedas. It may be possible that the doctor misunderstood the ET telepathy. It is also possible that this ET did not know that on earth we are in the Kali Yuga now and he came from his Sattya Yuga, which we have passed already on earth more than a million years back.

### **4. BODY IMPLANTS**

UFO-ETs abduct humans into their UFO space crafts and then, beside many other things, in some cases, insert small microscopic electronic biomechanical devices inside some of those human bodies. These devices are made from specialized materials normally not found in earth. These devices have their own yogic power as we will see from their characteristics. Abductees do not remember what happened to them. ETs can erase their memory from their abductees. This is also an example of their yogic power. However, such memories can be recovered by hypnosis. This is so because memories are not in our brains; they are permanently recorded for eternity, even before the events happen.

#### **4.1 Dr. Roger Leir**

Dr. Leir began his pioneering work with the medical and surgical aspects on alien implant research. He has presented

his research all over the world and was one of the seven American researchers to be keynote speakers for the opening of the UFO Aerospace Museum in Japan.

Dr Roger K. Leir (1935-2014), podiatric physician and surgeon, attained his Bachelor of Science degree in 1961 and his Doctor of Podiatric Medicine in 1964 [Leir, 2005a, p3].

In the late 1980's he became a member of MUFON, the Mutual UFO Network, and eventually functioned as an investigative reporter for the Ventura-Santa Barbara chapter's monthly periodical, *The Vortex*.

#### **4.2 Implant Features**

A total of seven surgeries were performed by January 1998. Implants, retrieved from the abductees, have three important features that Dr. Lier has characterized (1) a Metallic part, (2) the Cladding that covered the metallic part, and (3) some specialized soft human body tissues that connects to the implant.

One of the metallic parts was in T-shape with two small rods. The horizontal portion contains an iron core which is harder than the finest carbide steel. This rod is magnetic. When viewing this rod, as seen in the electron-microphotograph, it appears to be structured. One end is in the shape of a barb, while the opposite end is flat. In the center is a small depression. The shape of this depression conforms exactly to the shape of one end of the vertical rod. Just to give an idea of their sizes – one of the last objects was narrow and elongated, measuring less than one-half a centimeter [Leir, 2005a, p145].

The iron core is covered by a complex layer of elements which forms a cladding. One portion of this cladding has a crystalline band which circles the rod. The vertical rod contains a similar cladding but the core is composed of carbon instead of iron and it is magnetoconductive, not magnetic (p150). The tests also indicated that iron and phosphorus were major constituents of the cladding material surrounding the iron core (p149). This membrane was shown to consist of a protein coagulum, hemosiderin, and keratin. All three of these substances are naturally occurring in the body but investigation has shown no record of this combination in the medical literature (p146). Of the seven cases, three consisted of metallic objects covered by a dark, gray, shiny membrane which could not be opened with a surgical blade.

Almost all of the specimens fluoresced under ultraviolet black light. Working with a chemist, they subjected all three specimens to ultraviolet black light and found they fluoresced a brilliant green color. They discovered that in a small percentage of abductees there was also a similar colored fluorescence present on their skin (p139). Dr. asked the patient to hold up her palms and keep her fingers outstretched. Dr. moved the black light over the area and much to his surprise, her palms were once again glowing a brilliant pink (p139).

#### **4.3 Yogic Power Of Implants**

Everything that happens in the universe is a consequence of the actions performed by the corresponding soul. Therefore all actions represent yogic power. However, when we encounter day to day normal activities, we do not recognize them as such. When the human body does not reject an implant, for example, then that indicates a specialized yogic power of that human given to him by the UFO-ET.

Dr. Roger wrote, (below is not an exact copy), while describing the surgical operation of removal of an implant -

“We continued in our search by using the instruments at hand to dissect the soft and fatty tissue of the toe, trying to visualize the sought after object. With that, I began the careful dissection to free the foreign body from its fatty and fibrous tissue attachments. In just a few moments I announced, “Here it comes!” and with one final tug, the object came free from the inner confines of the toe (p51)”. It was not known to Dr. Leir why such a device was placed in such a location of the toe.

Research and laboratory analysis have given him to draw the following conclusions, (again, not an exact copy) –

“One of the most shocking findings was the large amount of nerve proprioceptors found within the tissue sample. Another astonishing finding was the complete lack of visible microscopic inflammation in the tissue samples. All in all I found that it is impossible to have a foreign substance enter the human body without having the body react to that substance (p138)”.

The soft tissues adjacent to the objects underwent analysis and the findings demonstrated conglomerations of nerve cells (p146).

Proprioceptors are nerve endings near the object that help to communicate information from the object to and from the brain. It is interesting to see that a human body is talking to a foreign device directly. Inflammation is natural, whenever there is foreign body, and to control such inflammation, a lifelong medication is necessary; which was not obviously required by the abductees.

### **5. COMPARING YOGIC POWER**

#### **5.1 Major Healing**

**Earth Yogi** - A Himalayan guru, the Bengali Baba, told one of his disciples, who later became Swami Rama, to go to Kanpur and meet Dr. Mitra who is very sick, and he is remembering us. Give him a love pat on his right cheek and he will be alright. Swami took bus, train, and car to reach the town. Everything got automatically arranged for him. He saw three doctors are helping the patient, Dr. Basu said he has a brain haemorrhage, he is bleeding from right nostril, he is lying down and cannot sit, and there is no facility for brain surgery in the town. Swami gave him a soft pat on his right cheek, and after few minutes the bleeding stopped. For more details see the book by [Rama, p.113-115]. This example also

shows a guru always knows where and when his students are calling him. There is no need for a GPS tracking system.

**UFO-ET** – “At the same time, however, in my caseload there is evidence that the alien encounters have been responsible for healing conditions ranging from pneumonias and leukemia to limbs paralyzed due to muscle atrophy from poliomyelitis [Mack, p409]”.

There is a YouTube video [Braden] showing three Chinese yogis healing a cancerous tumour on real time, under an ultra sound monitoring machine, within three minutes. They have performed such healing for more than hundred times in that medicine free hospital. The Brazilian ET told us how effortlessly and magically yogic power can heal any health problem. It is soul that is the cause for diseases and it is the same soul that is also the cause for cure.

### 5.2 Shape Changes

**Earth Yogi** - It is said that in ancient times Kings and Yogis did not have doors in their homes or palaces. Their doors always remained open for the service of people, whenever they needed them. To have sexual relations yogis used to go to forest, change shapes, to perform their act. In one such case a yogi couple took the shapes of deer. A king heard the sound, and used his sound guided arrow to kill the noise source. The yogi became angry, and cursed the King that the king will die whenever he will touch his wife with the intent of making love [Roy, Vol1, p21].

It should be remembered that there is nothing called cursing or blessing. They are all destiny events, predetermined for eternity [Das, 2022].

**UFO-ET** - I awoke the morning of the twenty-seventh very much as usual, but grappling with a distinct sense of unease and a very improbable but intense memory of seeing a barn owl staring at me through the window sometime during the night [Strieber, p15].

After hypnosis I recalled seeing a landscape with a great hooked object floating in the air, which on closer inspection proved to be a triangle. Then there followed a glut of symbolic material, so intense that even as I write I can feel how it hurt my whole brain and body to take it all in. I don't remember what this was — triangles, rushing pyramids, animals leaping through the air [Strieber, p72].

Triangles are used to identify Chakra symbols of Yoga Sutras [Satyananda, p574]. Judaism also uses triangles to indicate their holy symbols. Chakras are located along the spinal cord. Triangles are placed inside circles and circles are also inscribed inside the triangles. Multiple triangles are used to identify different chakras. The Brazilian ET told the doctor that humans do not know that the humans are spiritual beings.

### 5.3 Giving Third Eye Power

**Earth Yogi** – Going through many sessions of hypnosis Catherine acquired the third eye power in other areas also. She picked winners for every race in the racetrack, to demonstrate

her power to her skeptic father. Dr Weiss also went with them. She gave away all the money to the first poor man she found on the street on her way out of the track [Das, 2020b].

Dr. Weiss wrote, ‘I was both shocked and fascinated by her psychic abilities, especially the episode at the racetrack. This was tangible proof. She had the winning ticket to every race. This was no coincidence.’

**UFO-ET** - He's looking down at me. He's got a ruler in his hand. Has a tip of silver. 'Pouches me. I see pictures. (Long pause.) I see pictures of the world just blowing up. I see pictures of the whole place just blowing up when he touches my head with this thing. (Weeps). Jesus. It's a picture of like a whole big blast, and there's a dark red fire in the middle of it and there's white smoke all around it [Strieber, p35].

That is how a yogi guru gives the third eye vision to a disciple, and the student sees the entire vision, depending on the scope of the yogic power allowed by the guru. We see the same method is used by Krishna of Gita to give the vision to Arjun.

Krishna says in verse (G.11.8) – “But you cannot see Me with your present eyes. Therefore I give you divine eyes. Behold My mystic opulence!” [Prabhupada]

Arjun then saw everything about the life and the universe and became very scared. Told Krishna to stop and said I believe you. There is no need to use any instrument, some people use one finger, and some do it using mind or telepathically. It may be that the UFO-ET did not want to physically touch at that time.

### 5.4 Reading Human Memory

**Earth Yogi** - Jadav Chakravarti was one of the most eminent mathematicians of India during his time, and the author of the book *Chakravarti's Mathematics*. Later he renounced the world to become a swami.

So I asked one of the lawyers, “Can you tell me of anyone who is being tried unjustly in this court?” He said, “Yes, I have such a case.” I went back, and Swamiji said: “Okay, this man will be acquitted, and I will now tell you word for word the judgment that will be handed down.” He dictated the judgment to me, although he was not a lawyer. He said, “I have made three mistakes purposefully. The judgment will be exactly like my dictation, and it will also have these three mistakes.” I typed up his dictation.

When the judgment was later handed down every word, comma, and period was exactly the same as what had been dictated to me. He said, “Compare my dictation with the judgment and you will find that the same two commas and one period are missing.” The dictation perfectly matched the judgment [Rama, p108].

Events are already written in the memory of the universe; and can be read exactly by using the third eye vision of the yogi.

**UFO-ET** - Human memory cannot be created or destroyed. It exists for eternity. Nobody can delete or corrupt it also. You

may not be able to access it any time you want. And that happens many times in our life. Sometimes, as you have noticed, even at very hard effort we cannot bring the memory, but later it just pops up automatically. Hypnosis can bring it most of the times. Not everybody can always get the past life memory also. All results, however, depends on your destiny at that moment.

Ed wanted to write things down so he could remember later, but she (the lady ET) would not let him and "just worked at my perception by awareness, sort of mind to mind." Sensing his frustration she assured him, "You will remember when you need to know [Mack, p33]."

Ramayan has a story like that. Hanuman had forgotten all his major yogic powers. He was then told all about his life stories. Then he remembered everything and could help Sri Ram to find his kidnapped wife Sita. Do not think that the Ramayan story is a fiction and not real. Every event that happened in Ramayan is still happening in our world today. The greatest event, kidnapping of Ram's wife Sita, is still happening almost every day. Somewhere someone is kidnapping someone else's wife. That is why Bible says there is nothing new under the sun; whatever has happened will happen again.

### 5.5 Telepathic Communication

**Earth Yogi** - The book [Govinda, p114], describes one telepathic communication skill acquired by yoga meditation that can help to communicate with another person in a different country without any knowledge of the person. While living in Tibet, Govinda wanted to know about his mother's condition in Germany. A Tibetan yogi within few minutes brought the details about his mother. Two weeks later Govinda received a postal mail from his mother confirming the exact same information. We talked about this story before, but here the context is different.

You may recognize that our cell phone technology can provide this capability. Even one day we will have phones with built-in translators which will be able to communicate in many different languages. But it is not free, so everybody cannot have it. The cell phone is not a natural object; as a result it radiates, and causes noise, health problems, brain cancers, etc. It has technological problems also – absence of network, signal loss, battery down, and many types of noise and distortions. Moreover yogic power gives many other capabilities along with telepathic power.

Cell phone technology can use only oral languages. Oral language is the most confusing method of communication. And probably that is why the world has produced so many languages and still could not identify and solve the underlying issues. Our thoughts do not come in languages inside our mind. The brain converts thoughts into biochemical signals, which is then converted to mechanical vibration into our voice system, then the voice propagates through air media as vibrations and our ears convert that to biochemical signals and the whole thing is reversed again to the mind. But telepathy

uses the original signals of the thoughts. Telepathy is the universal language; we can use it to communicate with animals, trees, plants, etc.

**UFO-ET** - Scott was an abductee examined by Professor Mack, the Harvard psychiatrist, using hypnosis. Scott says in a session:

The "telepathy" he experiences during the encounters as "a two-way channel. They know your thoughts and you can see theirs. It's quite traumatizing because of its unfamiliarity [Mack, p97]".

### 5.6 Passing Through The Walls

**UFO-ET** – The following paragraph, taken from the Abduction book by John Mack, a Harvard University Psychiatrist, shows that the doctor has authenticated the accounts of the abductees passing through the walls.

(p21) These individuals reported being taken against their wills by alien beings, sometimes through the walls of their houses, and subjected to elaborate intrusive procedures which appeared to have a reproductive purpose.

(p31) ...the means by which the alien beings "float" people through doors, windows, and walls; the switching off of memory and consciousness of abductees and potential witnesses and other forms of mind control ;....

**Earth Yogis** – "Trailanga Swami always remained completely nude. The harassed police of Benares came to regard him as a baffling problem child. The natural swami, like the early Adam in the garden of Eden, was utterly unconscious of his nakedness. The police were quite conscious of it, however, and unceremoniously committed him to jail. General embarrassment ensued; the enormous body of Trailanga was soon seen, in its usual entirety, on the prison roof. His cell, still securely locked, offered no clue to his mode of escape [Yogananda, p219]".

### 5.7 Levitation

**Earth Yogi** – "Between five and five-thirty am we were still talking, when the swami suddenly said, "Now sit in meditation. In five minutes I will leave my body. Its time is over. This instrument which is called body is not capable of giving me more than I have already attained, so I will leave it behind." Five minutes later, he sang out, "Aumm . . ." and then there was silence [Rama, p138].

When we both tried to lift him, we found that we could not budge his body. Then we brought a branch from a pine tree and inserted it under his thighs to pry him loose, but we failed. We tried everything we could think of for over an hour, but could not move him an inch.

I often recall what happened next. I shall never forget the experience. A few minutes before sunrise I heard someone say, "Now we will carry him." There was no one around, so I thought, "Perhaps I am imagining it." My brother disciple also

looked around. I asked, "Did you hear something?" He said, "Yes, I also heard it." I asked, "Are we hallucinating? What is going on?"

Suddenly the swami's body rose into the air, apparently of its own accord, and slowly moved toward the Ganges. It floated in the air for a few hundred yards, and then lowered and sank into the Ganges.

**UFO-ET** - A similar levitation experience of ED, is summarized by the doctor, after hypnotic regression. Here ED describes the actual feeling of the mechanism [Mack, p58]:

As the tingling sensation "at the base of the skull" continued, Ed felt himself drifting out of the car. He made a growling sound as his anger came back, but then felt relaxed and even "happy," which puzzled him. Two or three of the beings were "looking at me" and Ed experienced "a sensation of floating, and my whole body is starting to float. I'm floating, I'm floating, I'm floating!"

## 6. PERIODICITY AND THE YUGAS

Periodicity of the events in nature may give us a reason for the visitation of the UFO-ETs to earth. We see that the UFO-ETs are very high level yogis, as explained with the evidences presented in this article. We see that one ET in Brazil, expressed telepathically that capability of ETs, to the doctor who treated that ET. This means there are many planets in the universe, where they have Sattya Yuga in progress, at this time of the earth. The ETs have come to the earth to have a firsthand look at the situation in Kali Yuga. Our history, described in the Vedic epics, provide the existence of such Yugas on the earth at some past time periods. We also see that the Yuga system is a part of the eternal recurrence of the universe, with many very large periods. In the western world such a system is known as Gold, Silver, Bronze, and Iron ages. Bible, in Genesis, also describes some features of humans in those ages. We have also found all major ideas of the Vedas are present in the Bible [Das, 2022].

It may be quite obvious to many of us that the life is periodic on earth. We take birth, grow, complete our tasks, become old, die, wait for some time, and then reincarnate to begin the cycle. If we sum such periodic events of individuals then we will find that the societies, cultures, nations are also periodic. If we consider larger time scales then also we will find many other types of periodicities. Vedas talk about periodicities of ages or Yugas of the entire planet. Since the Bible contains many themes from Vedas, it is possible for the books of Judaism to contain the concepts of Yugas also. Bible has many verses that support such concepts of eternal recurrences, as described by Friedrich Nietzsche, the German Philosopher [Nietzsche].

### 6.1 Multi-Verse

Periodicity may be interpreted as - I am here now, therefore I was here before, and I will be therefore here in the future also, and this can create confusions about who am I really. This comes from the confusion about the concept of periodicity.

We must remember that all these copies of me are not simultaneously available in all these different places and at same time. No divine vision or third eye vision will show that I am in all places simultaneously at same time. My soul can exist in only one place, and in one body, at any time. There are examples of earth yogis, Trailanga Swami, who could move out of the jail, instantly from inside to outside and back. The root material particles which are used to manifest my body can only occupy only one physical place at any one time. Thus the concept of multi-verse does not seem to be meaningful and necessary. In electrical engineering, a periodic signal for multi-period can be displayed simultaneously, on the oscilloscope screen. But that does not mean the same electron beam is at two places at same time, it is a digital display by software, it is only a trace on a graph paper, just like a hand drawn picture. Catherine saw horse races correctly, which cannot be seen by any technology other than yogic power; these races did not happen in a multi-verse.

Many such cases have been described in Vedas. Indra changed body shape to have sexual relations with Ahalya, the wife of Gautom rishi. Transformer toys came from the similar concepts of monsters changing shapes constantly, with different abilities, to win over the opponent. Some lizards can change body colors. We know how caterpillar changes to a butterfly. These should not be treated as multi-verse examples; these are also not periodic events. Same ET can take many different physical shapes, like beautiful humans, owls, etc., and very much like earth yogis of Vedic times.

### 6.2 Number Of Years In Yugas

In Mahabharat , Rishi Markandeya said,

"Four thousand years have been said to constitute the Krita (Sattya) Yuga. Its dawn as well as its eve, have been said to comprise four hundred years. The Treta-Yuga is said to comprise three thousand years, and its dawn, as well as its eve, is said to comprise three hundred years. The Yuga that comes next is called Dwapara, and it has been computed to consist of two thousand years. Its dawn, as well as its eve, is said to comprise two hundred years. The next Yuga, called Kali, is said to comprise one thousand years and its dawn, as well as eve, is said to comprise one hundred years. Know, O king, that the duration of the dawn is the same as that of the eve of a Yuga. *And after the Kali Yuga is over, the Krita Yuga comes again.* A cycle of the Yugas thus comprised a period of twelve thousand years. A full thousand of such cycles would constitute a day of Brahma. A same number is for one night of Brahma [Roy, Vol3, p397]."

Brahma is same as soul. Four thousand years (*of the deities*) is the duration of the first or Krita age. *1 god day=1 human year=360 human days; that is, one full circle around the sun is one god day or deity day* [Roy, Vol9, p167]. Half circle is 12 hour-day, remaining half circle is one 12 hour-night. 1 god year = 360 god days.

Krita Yuga = 4000 +400+400=4800 god years. Treta Yuga = 3000+300+300=3600 god years. Dwapar Yuga =

$2000+200+200 = 2400$  god years. Kali Yuga= $1000+100+100=1200$  god years. Total of four Yugas =  $(4+3+2+1)*\text{Kali Yuga} = 10*1200$  god years= $12000*360$ god days = 4,320,000 god days = 4.32 million human years; because 1 god day = 1 human year. One god day is one round of the sun by the earth. As one example: Kali Yuga = 1200 god years =  $1200*360$  god days = 432,000 god days = 432,000 human years. Total number of human years in this sequence of four yugas is, 10 times kali yuga, 4.32 million human years.

The sequence starts with Sattya, then Treta, Dwapar, and ends with Kali Yuga. *After Kali, it starts again with Sattya Yuga* [Roy, Vol3, p397]. Thousand such Yuga-cycles create one day, or 12 hours, called Brahma day; Brahma night is also of same length of 12 hours. One full Brahma day is for 24 hours, called Kalpa, is considered as one period of the universe. Thus the entire Universe also reincarnates every such Kalpa.

(G:8.17) By human calculation, a thousand ages taken together forms the duration of Brahma's one day. And such also is the duration of his night [Prabhupada].

Numerically, therefore one Brahma Day =  $1000*(4320,000)$  years = 4320,000,000 = 4.32 Billion human years. One Kalpa = 1 Day + 1 Night =  $2 * 4320,000,000$  years = 8640 Million years = 8.64 billion years = One period or one Kalpa for the universe [Prabhupada, p518]. There are higher level periods also.

Brahma lives 100 Brahma years, see page 518 of Gita [Prabhupada] =  $100*360$  Brahma days = 36000 Brahma days \* 8640 Million years =  $360*864$  Billion years = 311,040 billion years = 311 trillion years + 40 billion years. Thus this is another higher level period of the universe, beyond Kalpas. Brahma is same as soul. But souls do not die, may be this means that the soul becomes free again from its subtle body. Sattya Yuga says there were no gods in their times, that means Brahma, Vishnu, and Shiva, if they exist, are all highest level yogis and they are born, create their subtle bodies, every 311 trillion plus years [Prabhupada, P519].

The question then haunts us again, what did we all do over so many years of life? What was our purpose in this universe? It may take this long time for many souls to clear their subtle bodies and become a free soul again. It is the creation of the subtle body by the soul, which bounds us to the cycle of reincarnations. You can get the transcendental body like Krishna to become free from suffering. Rabindranath said "I am a soul, lost my way, and have come to your place, do you know me [Tagore, *ami path bhola ak pathik*]?" As mentioned before, we do not reincarnate for us only, we incarnate for the entire universe, that is, for others.

Since we know that the UFO-ETs are visiting the earth now, their land or planet maybe in the Sattya Yuga now. Our Earth was also in Sattya Yuga at one time, more than several million years back, as we can find in the stories of that period

in Vedas. We see that Ravan, Indra, Indrajit all had UFO like flying spacecrafts capable of travelling at mind speed. Thus one of the reasons for UFO visitation may be to examine what happens to a planet under Kali Yuga. Many abductees have described that ETs have shown the abductees how clean the earth environment was during the Sattya Yuga.

## 7. HUMANS IN YUGAS

Description of life in four yugas, from Van Parva, Mahabharat is copied here to show that earth yogis at one time were as good as UFO-ET yogis of present time. Hanuman of Ramayan is telling Bhim of Mahabharat – the life characteristics in the four Yugas:

### 7.1 In the Krita (Sattya) Yuga

"There were neither gods, nor demons, nor Gandharvas, nor Yakshas, nor Rakshasas, nor Nagas. And there was no buying and selling. And the Sama veda, the Rich veda, and the Yajus veda did not exist. And there was no manual labor. And then the necessities of life were obtained only by being thought of. And the only merit was in renouncing the world. And during that Yuga, there was neither disease, nor decay of the senses. And there was neither malice, nor pride, nor hypocrisy, nor discord, nor ill-will, nor cunning, nor fear, nor misery, nor envy, nor covetousness" [Roy, Vol3, p318].

We can see that there was no money in the Krita age, and therefore they had moneyless economy [Das, 2012]. In reality they did not have any economy, yet they had everything they wanted. If we can remove money we will also learn the truth, become happy, and go back to the Krita Yuga. Knowing the correct truth and without any doubt is the only way for emancipation [Virupakshananda, SK: 64].

It is only the ignorance that brings malice and no peace [Das, 2020a]. As we will see that UFO-ET possibly came from planets that have this Krita age now. Their spacecrafts are products of their yogic power only. Our earth has long past this Krita era as described in the Ramayan and in the Mahabharat stories.

### Giri Bala

This example shows that if you know the truth then you will not need food and you will have a disease free body. There is a photograph in the book by [Yogananda], whose caption says: 'Giri Bala. This great woman yogi has not taken food or drink since 1880. I (Yogananda) am pictured with her, in 1936, at her home in the isolated Bengal village of Biur. Her non-eating state has been rigorously investigated by the Maharaja of Burdwan. She employs a certain yoga technique to recharge her body with cosmic energy from the ether, sun, and air'.

Giri Bala said 'From the age of twelve years four months down to my present age of sixty-eight—a period of over fifty-six years—I have not eaten food or taken liquids.' An

advanced level yogi guru came to see Giri Bala, and initiated her to achieve freedom from eating food. For more details see the original reference [Yogananda, pp264-271]. We see in Ramayan story that yogi Viswamitra teaches Ram how to survive without food, sleep, and freeze the shape of his body from any changes of aging.

### **7.2 In the Treta Yuga**

“Sacrifices are introduced and virtues decrease by a quarter. And Narayan assumes a red color. And men practice truth, and devote themselves to religion and religious rites. And thence sacrifices and various religious observances come into existence. And in the Treta Yuga people begin to devise means for the attainment of an object; and they attain it through acts and gifts. And they never deviate from virtue. And they are devoted to asceticism and to the bestowal of gifts. And the four orders adhere to their respective duties; and perform rites.” [Roy, Vol3, p319].

### **7.3 In the Dwapara Yuga**

“Religion decreases by one half. And Narayana wears a yellow hue. And the Veda becomes divided into four parts. And then some men retain (the knowledge of) the four Vedas, and some of three Vedas, and some of one Veda, while others do not know even the Richs Veda. And on the Shastras becoming thus divided, acts become multiplied. And largely influenced by passion, people engage in asceticism and gifts. And from their incapacity to study the entire Veda, it becomes divided into several parts. And in consequence of intellect having decreased, few are established in truth. And when people fall off from truth, they become subject to various diseases; and then lust, and natural calamities ensue. And afflicted with these, people betake themselves to penances. And some celebrate sacrifices, desiring to enjoy the good things of life, or attain heaven. On the coming of the Dwapara Yuga, men become degenerate, in consequence of impiety.” [Roy, Vol3, p319].

### **7.4 In the Kali Yuga**

We are in the Kali yuga on earth at the present time. It started at the end of Mahabharat war, after the death of Krishna. The book on Soul Theory, [Das, 2014b], gives some estimates of the time period of the end of Mahabharat war (about 30,000 years) based on the modern technology like – ocean level simulation analysis, under ground radar imaging, archaeological discovery of under ocean structures in the west coast of India, etc. In Kali Yuga, Mahabharat says:

“A quarter only of virtue abides. And in the beginning of this Iron Age, Narayana wears a black hue. And the Vedas and the institutes, and virtue, and sacrifices, and religious observances, fall into disuse. And (then) reign of disease, and lassitude, and anger and other deformities, and natural calamities, and anguish, and fear of scarcity. And as the yugas wane, virtue dwindles. And as virtue dwindles away, creatures

degenerate. And as creatures degenerate, their natures undergo deterioration. And the religious acts performed at the waning of the yugas, produce contrary effects. And even those that live for several Yugas, conform to these changes [Roy, Vol3, p319]”.

## **8. MEMORY IS NOT IN THE BRAIN**

Examples like: Jadav Chakraborty – court case; Catherine – horse race; Sawami Rama’s birth – hole in the ear; etc., described in this article prove that memory is not in the brain. Catherine picked up the correct horse numbers in the racetrack. The guru predicted that the Swami Rama will be born 18 months later who will have a hole in his ear. Jadav Chakravarty predicted the high court judgment exactly, including the errors, in the statements. Therefore hypnosis cannot corrupt, delete, or inject memory. Memory loss means brain is not working properly to interpret what soul is fetching from the memory bank. Soul cannot do anything wrong; its activities are guided by the destiny, which is predefined. No amount of technology, other than the yogic power, can see this memory.

Human memory, or for that matter memory associated with any object or event, is not inside our brains. It is outside, and is stored in Akashik records. Akash means space or sky. The nature of that memory location probably is not known, maybe not even by the seer yogis who can see that memory. This is like records in a video cassette recorder or in a compact disc tracks. The data is recorded serially in both cases. Human mind works only sequentially. Soul reads that memory, gives it to the mind for processing and executing by the brain and organs.

The concept of this record can be explained by using the internet cookies. Cookie is a small amount of data stored in my computer. But this same cookie is also stored in many other computers in the network, through which my internet message has been delivered to my computer. Thus, even if I delete my cookies, or if my computer dies, these cookies will remain available in the internet network. And any network expert will be able to retrieve these cookies to identify the information I exchanged.

Human memories may also work in the same way. My soul is interacting with all the souls in the universe, and they all remember my activities. Since everything is predetermined, all this information will remain in the universe for eternity, even before I was born. Thus if you can connect to your soul or any other soul, you will be able to read my entire memory, which in the case of nature, is a 3D video. This video is recorded serially in a tape recorder, with tags like my name, date, time, place, and the identity of my soul (Ahankar), among other things. Ahankar is recorded in the subtle body of my soul. Clearly there is no concept of missing time also.

In a similar way, when a potter creates a pot out of clay, he does not create anything new; the pot was already there in the memory of the clay. Potter just manifested the pot out of the clay. The same thing can be said about the material that

created the clay. Since all objects are created from the root material particles, the memory of the universe is also present in these root material particles [Das, 2019].

Nobody will be able to edit, delete, insert, or distort this memory contents. They are all, read only memory. Since life is predetermined, such memory represents the destiny, and is created by the destiny of that individual. Thus there is nothing called, hidden memory, false memory, distorted memory, overlapped memory, or faded memory. A correct seer yogi will be able to see and show exactly, and clearly, the entire video, precisely as it happened in real time; just like Krishna did to Arjun in Gita, by giving third eye vision to Arjun. UFO-ETs are also showing such videos to their abductees. They should be trusted because they have shown many other capabilities.

### **8.1 There is no God**

Both Vedas and Bible say that there is no God in the universe [Das, 2022]. Bible says – God is spirit; and Vedas say Namaskar. That is, no one has created the whole universe. The universe is not an object. It is a collection of all objects. All the individual objects in the universe have their own individual god, which is the soul of that object, and which has created that object. We have proven that theory by the example of Stevenson and many other similar examples. Namaskar means the same thing; namo + swa + akar. Namu means I pray or bow to your soul (s, swa, He), who has taken your shape or akar. Thus even every ordinary man knew that everybody is created by his own soul. At one time in India, people used to say that they have 33 crore gods, because that was the population of India at that time. A well known Indian Novelist, Sarat Chandra, said – “If God is not everywhere then why do we call him God.” Everywhere there is a soul. The entire universe is filled with soul particles.

The above paragraph has a profound change in concept – data remains the same but the theory is changed. You look at the night time sky. The sky did not change; only your understanding has changed. It is now full of souls and the individual creators, like ETs. In the case of Galileo we had the same change of concepts, but data remained the same. On earth we see that different objects are made by different persons; why then the same idea cannot be valid for all the objects in the sky? Different objects are made by different souls.

Destiny is the highest level law of the universe. Destiny is mentioned in both the Bible and in the Vedas. In Gita Krishna says that, ‘he knows what happened in the past, what is happening in the present, and what will happen in the future (G: 7.26)’. This can be known only by achieving highest level yogic power. Krishna was a Tri-Kal-Darshi, had the divine vision for all three time periods, past, present, and future. Thus God cannot change anything in our life; life is visible, deterministic, and predetermined. Brahma, Vishnu, and Shiva, if they exist, are the highest level yogis, at point zero, in the 0-100 in the yogi-scale; I am at the lowest range 95-100 [Das,

2020b]. For the same reasons there is no love also in the universe. Everything is planned, moment by moment.

Inside our corporations, we fire anybody and everybody, without any reasons. We create poverties, homelessness, at our wishes. ETs crash, and we kill them, and no other ETs come to rescue them. A high level yogi kicks Vishnu on his chest, because he is not waking up from his Yoga-Nidra. Another yogi curses Shiva, saying that Shiva will chop the head of his own son Ganesh. Such events have reasons, according to the destiny law [Das, 2022]; but it indicates that there is no love or respect for anybody. Everybody is engaged only in work very much like a robot. This is the same reason why we forget our past life memories.

### **8.2 Need for yogic power**

There are many saints of modern times or Kali Yuga, who say that no one should pursue yogic power. It is a waste of time. Those who say such ideas did not acquire such power. They say, instead, people should pursue love and God. But as explained before, there is no God and no Love, anywhere. Such concepts are delusionary or misleading to keep us ignorant like them. You can see that there is no love inside the corporations. We are only looking for more money, more business, more profit, etc. Anyone can be fired at any time as mentioned. Money has been created to make us slave and keep us as slave. There is no way to survive without money. Yet we know money is free and abundant at its source, the central bank. Then where do we see love?

On the other hand we see that in the Treta Yuga all great rishis, like Ravan and Sri Ram of Ramayan had Yogic power. Sri Krishna of Mahabharat and Gita of Dwapor Yuga had also yogic power. They had weapons created and guided by the yogic power. As an example, it is entirely feasible, for Arjun to acquire an arrow using yogic power, which could cut the head of Jayadratha and guide it to drop on the hands of Jayadratha’s father who was meditating at some unknown location. And as per a curse, his father’s head exploded when the father dropped the head of his son on the ground [Jayadratha].

Using yogic power, you can levitate, and therefore can remove all the debris from an earthquake. You can also convert the debris back to the root material particles, and thus effectively make the debris to vanish. Yogic power can give you a transcendental body, like Krishna, and not become sick any more, and never become hungry. Thus the objective of life should be to become a highest level yogi like Krishna. Only yogis like Krishna can clean the Earth and bring it back to a purified state based on true knowledge. Only yogis like ETs can manufacture spacecrafts that can travel from galaxy to galaxy in moments at mind speed.

Without yogic power you cannot understand or know the Vedas and the Bible. Without yogic power you cannot know that the memory is in the universe, humans can levitate, pass through the walls, arrows can be guided, etc? These are the

properties of the root material from which the entire universe is created by their souls.

However, you cannot have the ultimate knowledge. You cannot know your soul, as Krishna says in Gita [Prabhupada, G:7.26], because creations (your physical body) cannot know the creator (your non-physical soul). For the same reasons, a robot cannot know its creator, who is a human. A robot cannot acquire divine vision, and become tri-kal-darshi, which requires several incarnations. All knowledge cannot be written down; you cannot describe in writing, the experience and knowledge of seeing the Grand Canyon, for example.

## **9. GIVING EYESIGHT TO BLIND**

### **9.1 Yogic Power of a Hybrid ET**

Helen Littrell, is a co-author of “*Raechel’s Eyes*” (Granite Publishing). The book describes the relationship between a human-ET hybrid girl named Raechel, placed at American River Community College in 1972 with Helen’s legally blind daughter, Marisa in order to integrate Raechel with students of her age.

UFO-ET and human hybrid Raechel was a young girl, retrieved from a crashed UFO and adopted by an USAF Col. He placed her in a college with a roommate, Marisa, who was a legally blind young girl. The book, *Raechel’s Eyes*, is written by Marisa’s mother. There are many videos and websites on this case. The story is amazing, but real and very sad. Raechel had to leave her college abruptly. She left a note for Marisa in her room, which Marisa could see and read. The note said – “You were my best friend; I left a little gift for you, your eyesight”. Do not reject UFO-ET subjects just because government is not telling you, do your own research to find the truth. Raechel’s case is another example of yogic powers of UFO-ETs showing us that Vedas are truly universal and not just limited to the earth.

### **9.2 Earth Yogi**

Lahiri Mahasay, who is discussed here in manufacturing a palace subsection, touched the forehead of his born blind student and told him to chant his God’s name for seven days, and the student got his eyesight back [Das, 2014a]. In Bible we see a similar result produced by Jesus Christ. Thus again, yogic power is everywhere. Thus yogic power should be very much the objective of every life. Pursuing for such powers cannot be a waste of time. It is the only way for achieving a disease free transcendental physical body like that of Krishna.

## **10. MANUFACTURING A HUMAN BABY**

The following example [Pasricha] was discovered, and then presented in a scientific way, to the western world by Ian Stevenson (1918-2007), a Professor of Psychiatry, at the University of Virginia. This example shows that the nature always demonstrates all its truths, so that we can observe them and learn from them, for our own emancipation. We do not

need to speculate using assumptions and create philosophies about the nature. Such examples were already known by humanity all over the world, and for very long time.

A baby boy was born in a hospital, with a bullet wound marks on his chest and back. Doctors, nurses, and parents, all recognized this birth defect. When the boy learned to talk, around the age two, then over a year or so he explained how the marks happened in his body. He remembered and described his past life name, how, when, and where he died, including the name of the hospital, etc. Very soon the boy became sick and had to go through a surgery to save his life. Doctors found a straight line bullet path inside the baby’s body exactly matching the autopsy record of his previous life data from the hospital where he died in his past life.

The above example shows, among other things, that the following is true. (a) The babies are not naturally grown inside the mother’s womb. The soul of the baby manufactures the human body according to its own destiny. That is why every baby is different, both physically and mentally. (b) Since during the growth period, there was no brain for the baby, all intelligences and effects came from the memory of the universe and retrieved by the soul of the baby, which is the creator of that baby. The phenomenon should also indicate that mind, soul, and memory are not inside the human body. (c) Every life is periodic - we take birth, die, and reincarnate. Since summation of periodic waves will be periodic, therefore the entire universe must be periodic. Bible also says, whatever has happened will happen again; there is nothing new under the sun.

## **11. MANUFACTURING A PALACE**

An entire beautiful palace can be built by a soul on its own using the root material particles by giving them varying properties, to create various decorative items, people, lawns and gardens, and all in moments. And when the purpose is satisfied, the palace can be dematerialized also in moments. Therefore, it is possible to build or manufacture an entire spaceship like UFO to have the properties to travel in intergalactic distances in moments. You can see such a UFO cannot crash or fail unless it is designed to do so by its destiny. The purpose of the crash therefore must be to give their technology to us and teach us their features and operations. This is how the truths and teachings are maintained all throughout the universe. If it is Kali Yuga in one planet then there can have Sattya Yuga in another planet. Soul is thus so helpful and divine. Our Bible also says the same thing; Jesus said that in the context of the born blind boy. Remember that the soul never dies; we are the same souls which lived in our Sattya Yuga also.

Babaji, a highly evolved advanced yogi, created a palace in the middle of night, in the magnificent Himalayan hills for initiating his disciple Lahiri Mahasaya. Lahiri was his disciple in Lahiri’s previous life. A companion guided Lahiri, and said

the master is awaiting you. Seeing the dark night highly illuminated, he asked if this is morning. The companion said this is the glow from the palace Babaji made tonight for you. In your past life you once expressed a desire to enjoy the beauties of a palace. Our master is now satisfying your wish, thus freeing you from the bonds of karma. This magnificent palace will be the scene of your initiation tonight into Kriya Yoga. All your brothers are here and will join in a hymn of welcome, rejoicing the end of your long exile due to your previous life. The palace will be dematerialized once your initiation is done. The book describes this in [Yogananda, pp235-241]:

"A vast palace of dazzling gold stood before Lahiri. Studded with countless jewels, and set amidst landscaped gardens, it presented a spectacle of unparalleled grandeur. Saints of angelic countenance were stationed by resplendent gates, half-reddened by the glitter of rubies. Diamonds, pearls, sapphires, and emeralds of great size and luster were imbedded in the decorative arches.

"Lahiri followed the companion into a spacious reception hall. The odor of incense and of roses wafted through the air; dim lamps shed a multicolored glow. Small groups of devotees, some fair, some dark-skinned, chanted musically, or sat in the meditative posture, immersed in an inner peace. A vibrant joy pervaded the atmosphere.

"The sage picked up from a near-by table a graceful vase whose handle was blazing with diamonds. 'Our great guru created this palace by solidifying myriads of free cosmic rays,' he went on. 'Touch this vase and its diamonds; they will satisfy all the tests of sensory experience.'

"I examined the vase, and passed my hand over the smooth room-walls, thick with glistening gold. Each of the jewels scattered lavishly about was worthy of a king's collection. Deep satisfaction spread over my mind. A submerged desire, hidden in my subconsciousness from lives now gone, seemed simultaneously gratified and extinguished.

"My stately companion led me through ornate arches and corridors into a series of chambers richly furnished in the style of an emperor's palace. We entered an immense hall. In the center stood a golden throne, encrusted with jewels shedding a dazzling medley of colors. There, in lotus posture, sat the supreme Babaji. I knelt on the shining floor at his feet.

'Lahiri, are you still feasting on your dream desires for a golden palace?' My guru's eyes were twinkling like his own sapphires. 'Wake! All your earthly thirsts are about to be quenched forever.' He murmured some mystic words of blessing. 'My son, arise. Receive your initiation into the kingdom of God through *Kriya Yoga*.' (p239).

"Babaji stretched out his hand; a *homa* (sacrificial) fire appeared, surrounded by fruits and flowers. I received the liberating yogic technique before this flaming altar.

"The rites were completed in the early dawn. I felt no need for sleep in my ecstatic state, and wandered around the palace, filled on all sides with treasures and priceless *objets d'art*. Descending to the gorgeous gardens, I noticed, near-by, the

same caves and barren mountain ledges which yesterday had boasted no adjacency to palace or flowered terrace.

"Reentering the palace, fabulously glistening in the cold Himalayan sunlight, I sought the presence of my master. He was still enthroned, surrounded by many quiet disciples.

"'Lahiri, you are hungry.' Babaji added, 'Close your eyes.' "When I reopened them, the enchanting palace and its picturesque gardens had disappeared, just as I was told before I came to the palace."

## 12. CONCLUSIONS

We have seen that yogic power is everywhere. A baby is manufactured inside mother's womb in a very specific way according to the destiny of that baby. In the same way an entire palace also can be manufactured for a specific purpose along with gardens and lawns, and people inside the palace. Therefore it is conceivable that an UFO space craft also can be manufactured using yogic power. In Vedas, Ramayan story have such spacecrafts. Similarly, implants also can be manufactured and inserted in the body of the abductees to perform in a specific way without doing any harm to the abductees.

We have seen that all the activities that a UFO-ET can do, an earth yogi can also do those same things even at the present time in our earth. We have also shown that our ancient books talk about Yuga systems and of civilizations on earth in those periods. In each Yuga period the lives of the humans have been described. Since on earth everything is manufactured by some soul, therefore it should be understood that everything in the sky is also manufactured by its own soul. Different planets will have different destiny at the same time. Thus we can easily understand that the UFO-ETs who are in Sattya, Treta, or Dwapar Yugas, can come from such planets to visit us. We do not need to consider different theories, dimensions, time travels, multi-verse etc. Everything is inside this only one universe and obeying the only one truth described by the soul theory of Vedas.

We have also shown that hypnosis is a valid and helpful process. Hypnosis cannot destroy or corrupt memory, because memory is not in our brain, it is in the universe and is recorded for eternity. We have described some examples to prove that memory theory. One of the most important results of hypnosis is that there is a possibility that someone like Catherine can acquire the third eye vision. Next: three appendixes are described, with another conclusion.

## APPENDIXES

It is said that such subjects of this article are neither scientific nor academic. There are no proofs and no logic. But the irony is that such thoughts are, in reality, valid for our modern science and have been already critically demonstrated in [Das, 2019]. We thought that they should be briefed and reminded for the skeptics again in three appendixes.

Appendix-A: We have very complex delusions about the terms like scientific, academic, proof etc. Moreover our present society does not even have a definition of truth [Das, 2014b, Ch1]. Truth gives us mental peace, and then physical peace. Truth makes us disease free. We found that in Sattya Yuga.

Appendix-B: will show that science is not the foundation of engineering. There is nothing called scientific. No engineering experiment can prove any scientific theories. Our academic institutions are not teaching us the truths, and keeping us ignorant. This is a part of the destiny of Kali Yuga; and over time the situation will deteriorate further.

Appendix-C: explains how manufacturing is done on earth and in the universe. We have given two examples in the main body; here we will present some theory of manufacturing from Vedas. We avoid the word creation, because it indicates existence of God. But manufacturing means we are making in a way to satisfy our destiny.

#### **Appendix-A: Truth Is Demonstrated Only By Nature.**

Galileo proved that the truth is always demonstrated by the nature. Yogic power examples in this article and also in [Das, 2020b] show that the truth can only be understood by using the third eye vision.

The laws of nature are the only truths. They must be observed. In this article we saw many examples of the laws of nature – reincarnation, destiny, humans flying defying gravity, humans passing through the walls etc. Thus, truths cannot be created or manufactured, and therefore cannot be tested [Das, 2019]. This is so, because our theories of science are all full of assumptions.

This eliminates the need for our present design of the academic institutions. Let us examine what we teach in a class room. Take for example Newton's first law. It says, "(1) In the absence of any unbalanced forces or any external forces (2) an object will continue in motion (3) in a straight line with (4) a constant velocity."

Clearly none of us have seen any such object on earth or in deep space. Therefore this is not a law of nature and therefore cannot be a truth. Yet our academic institutions are teaching this for more than 200 years now. Since all objects in the sky are continuously moving, there cannot be any straight line anywhere in the space. Since real numbers are not objects of nature, and the straight line does not exist, the foundation of the mathematics is nonexistent. So the entire math must be wrong and cannot be applicable for nature. Then what is called scientific? What is rational? Do you see that the above first law starts with an assumption (1) - in the absence of any unbalanced forces? If assumptions are false then quite naturally the results (4) must be false also. This is how we are creating and spreading lies, forcing people to remain ignorant. We do not need such academic institutions, instead teach to acquire yogic power, and then you will fly all over the universe like the UFO-ETs. Another simpler way will be to create moneyless economy (MLE) as it existed in the Sattya

Yuga [Das, 2012]. Truth and peace will automatically appear [Das, 2020a]; and yogic power will follow.

#### **Appendix-B: Science Is Not The Foundation Of Engineering.**

It must be understood clearly that there is a heaven and hell difference between science and engineering. Engineering is correct, because engineering uses objects of nature. However, since engineering also uses false theories of science and false money, engineering is full of patches and kludges, therefore very unreliable, unsafe, and pollutes environment. We give an example to illustrate the difference between the science and the engineering. We will find that the science is not the foundation of engineering. Engineering always came first and engineering is nature [Das, 2017a].

#### **GPS Design**

We are all very familiar with the GPS technology, because most of our cell phones and cars use GPS receivers. These GPS receivers track data from the satellites rotating around the earth. In physics there is a law, called Kepler's law, which says that a satellite will rotate around earth in an elliptical path, and then the same law gives a mathematical formula to find the position of the satellite at any point in time. This formula did not work for GPS satellites. So, engineers, physicists, and mathematicians modified that law significantly but still could not make the Kepler's law work. Eventually the GPS ground system was used to directly measure and find the positions of the satellites, upload that data to GPS transmitters, which then broadcasted that data to our hand held receivers to provide the desired accuracy. Even this did not work properly, so the ground station repeats the process every two hours or so, to maintain the accuracy requirements [Das, 2022].

Why did Kepler's law fail to work? The assumption ellipse is defined only on a plane of paper and around a stationary central point. But the earth is moving around sun, and takes the satellite with it in three dimensional space. Thus the path of the satellite can never be an ellipse. There are other objects, like moon, and planets of the solar system, which also influence the position of the satellite.

The sun is not stationary either, it is travelling along one of the spirals of our galaxy, that spiral is also rotating around the central core of the galaxy. Thus the path of the GPS satellite is immensely complex, beyond our imagination, and therefore cannot be translated using a simple symbolic language like mathematics. This example shows why our engineering is so full of patches and kludges. Consequently, our engineering cannot be reliable at all. This example also shows how data and information can be useless and misleading. Since science is based on assumptions, the data must be assumptions, and misleading also.

The above GPS example shows that mathematics is not valid for nature and engineering. In reality mathematics is not necessary at all for designing engineering systems. All we need is good measurement systems involving good sensors

just like human body has. Using measurements, just like GPS ground system, we can design and make any engineering system in a much more reliable and robust way [Das, 2012c].

### Appendix-C: Manufacturing On Earth and In Universe.

#### Two Causes

Consider this example, taken from the Samkhya Karika (SK) of Vedas [Virupakshananda]. - A potter makes a pot from the clay. In this example the pot is the effect or the object which is manufactured. Since the clay is used to make the pot, the clay is called the material cause for the pot. Similarly, the potter is called the efficient cause or the intelligent cause for the pot (SK: 3). Not anybody can make the pot. Someone who knows the process, the tools, and the material can only make the pot. Both material cause and efficient cause are necessary to create or manufacture any effect or object in the universe [Das, 2022].

#### Root Material Cause

If we take any material from any object or effect and ask repeatedly, what the material causes are for this material, then we will find some new materials. After a finite number of iterations, the process will stop. This search will be finite, because all objects have finite sizes. The last material where we stop is called the root material cause, root material, primordial matter, or simply matter. Bible calls it the dust and says – “All go to the same place. All came from the dust and all return to the dust [Bible, Ecclesiastes, 3:20].” This last material must be invisible; otherwise we will have to repeat the question. Its existence will be obvious, because we can see the effect, and therefore it must have a cause. Of course our third eye vision will be able to see it. This is how the yogic power becomes an essential tool in finding the truths of the universe.

#### Root Efficient Cause

In a similar manner, you can take the efficient cause, and repeatedly ask, what the cause for this efficient cause is, then after a finite number of iterations, you will arrive at the root efficient cause. As an illustration, the hands of the potter are making the pot, the brain of the potter is making his hands to coordinate, the mind of the potter, which is outside the human body is controlling the brain, and finally the mind is controlled by the soul, which is also outside the gross body and the subtle body. This soul is called the root efficient cause. Or in other words, this root efficient cause is defined as the soul. Like the matter, the soul is also a tiniest invisible particle. The Bible calls it the spirit [Bible, John, 4:23], and says “God is spirit”. It means that every object has a soul and that soul has manufactured that object according to the destiny of that soul. Thus this finite deductive logic proves the existence of the soul. Of course, all other examples of yogic power in this article also prove the existence of the soul.

In **conclusions** of the above appendixes, it can be observed that there are many animals that are more intelligent than humans. One such example is given in [Das, 2020b]. Degrees from academic institutions cannot make us more knowledgeable and intelligent; since everything we teach is wrong [Das, 2019]. Truths show that memory is not in the brain, it is in the universe; no humans can add or delete that content. Destiny is deterministic, eternal, and so is memory. Just like everything deteriorates, Kali Yuga is the deterioration of the Sattya Yuga, and this is the plan of the destiny by design. Nobody should be blamed for this.
