## Abstract:

Women safety has become an important issue in today's society. With the help of modern technology, women safety applications provide quick emergency support, live location tracking, alert messages, and safety features. These applications help women feel safer while traveling or in emergency situations. This research paper discusses the importance, features, advantages, and challenges of women safety apps. The paper also explains how mobile applications can improve personal safety and provide faster communication during emergencies

## Introduction:

In recent years, crimes against women have increased, making personal safety a major concern. Technology plays an important role in solving this problem through mobile applications designed for women safety. These apps provide features such as SOS alerts, GPS tracking, emergency contacts, voice recording, and location sharing. Women safety apps help users quickly contact family members or police during dangerous situations. The purpose of this paper is to study the working, benefits, and importance of women safety applications in modern society

## Conclusions:

Women safety applications are useful tools that improve personal security and provide emergency assistance. These applications use modern technologies such as GPS and mobile communication to help women during unsafe situations. Although there are some limitations like internet dependency and battery usage, women safety apps can still play an important role in increasing awareness and security. Future improvements can make these applications more efficient and user-friendly

## Acknowledgement:

I would like to express my sincere gratitude to my project guide, Prof. Bhagayshree Kumbhare, for her valuable guidance, encouragement, and continuous support throughout the preparation of this research paper. Her suggestions and motivation helped me complete this work successfully.

I am also thankful to the Principal, Head of Department, and all the faculty members of Smt. Radhikatai Pandav College of Engineering, Nagpur, for providing the necessary facilities, resources, and academic support required for this research work.

I would like to express my heartfelt thanks to my family and friends for their constant encouragement, cooperation, and support during the completion of this paper.

Finally, I would like to thank everyone who directly or indirectly contributed to the successful completion of this research paper. Vaishnavi Nakle
